

Non Functional Requirements

Performance

- Prediction should complete within a few seconds.

Reliability

- The application should provide consistent prediction results.

Usability

- The interface should be simple and easy to navigate.

Maintainability

- The project should be modular and easy to update.

Scalability

- Future Machine Learning models can be integrated without major code changes.

Portability

- The project should run on Windows, Linux, and macOS.

Security

- Input validation should prevent invalid data from affecting predictions.
